

Service:

European Biochar Certificate

Basis

European Biochar Certificate Standards for ecologically sustainable production of biochar for farming

Certificate

Valid for 1 year, the certificate is recognized throughout Europe

Additional information

Biochar produced in accordance with the standards of the European Biochar Certificate fulfils all the requirements of sustainable production with positive environmental performance and a positive carbon footprint. These standards guarantee ecologically sustainable procurement and production of biomass feedstock for biochar production, compliance with emission standards and environmentally safe storage. Biochar quality is comprehensively monitored and documented. All threshold values, corresponding to those of the Ordinance on Soil Protection are complied with. Certified biochar is suitable among other things for use as soil conditioner, animal feed supplement and filter substrate.

Benefit to customer

The European Biochar Certificate establishes your biochar's compliance with environmental, soil protection and animal welfare legislation in force. The certificate serves to guarantee the safe and ecologically sustainable use of biochar in farming.
